CUSTOMER GUIDE

CENTRAL RAILROAD OF NEW JERSEY

**SYMBOL FREIGHT TRAINS
INDUSTRIAL DRILLS**

**Schedules
Classifications
Connections
and
Customer Dock Times**

**For Information and Guidance
of Our Customers**

ISSUED MARCH 16, 1971

**D. N. Nelson
Manager-Freight Transportation**

The purpose of this book is to show, in condensed form, the scheduled freight train and industrial switching operations of The Central Railroad Company of New Jersey.

The schedules contained herein are realistic and designed to meet the shipper's needs, providing a through freight service from the shipper's dock to destination.

Our customers will find in this guide all pertinent information affecting the movement of freight over our railroad. A complete listing of CNJ sales representatives is included, as well as telephone numbers for departments covering all aspects of our transportation service.

We are presenting our service in a manner which will permit the shipper to plan his freight movement beginning at the loading dock. All connections on the CNJ, and those most frequently used by connecting carriers are presented.

Effective: 3/16/71

General Instructions

This book shows regular through and local train service with schedules, classifications and connections. Necessary supplements, revisions or corrections will be issued as required. No changes will be made in schedules, classifications or switching service without approval from the Manager-Freight Transportation. All times shown are Eastern Standard.

Loaded cars set out enroute due to defects will be repaired promptly and forwarded in the first available train. All cars set out short of destination or junction must be reported by wire from the Division Superintendent to the Manager-Freight Transportation, giving car initial, number, contents, originating point, destination and consignee. The consignee will be notified immediately.

Explanation of Codes Used

CNJ trains are identified as to direction by position of yard symbols (shown below), as well as by train numeral, i.e. first yard symbol is for origin yard, second yard symbol is for destination yard, odd numerals denoting westbound movement and even numerals denoting eastbound movement.

<u>Yard</u>	<u>Symbol</u>
Allentown - - - - -	A
Ashley- - - - -	F
Bridgeton - - - - -	S
Harrisburg (via Allentown)- - - -	H
Jersey City - - - - -	J
Jim Thorpe- - - - -	U
Green Pond Junction - - - - -	Y
Maybrook (L&H via Easton) - - - -	O
Phillipsburg- - - - -	G
Red Bank- - - - -	R
Taylor- - - - -	C
Wilkes Barre- - - - -	W

Examples:

Allentown to Jersey City- - AJ-2

Jersey City to Taylor - - - JC-3

Following codes are used to denote day of connection and whether train will set off or pick up:

<u>Code</u>	<u>Denotes</u>
P	To or from connection of previous day.
F	To or from connection of following day.
S/O	Train will set out at station shown.
P/U	Train will pick up at station shown.

Effective: 3/16/71
