SPECIAL INSTRUCTIONS

Special Instructions shown by numbers supplement, modify, or supersede the Rules for the Government of the Operating Department.

SAFETY FIRST.

Safe operation and conduct are more important than making schedule time.

OTHER RAILROADS.

Cincinnati Union Terminal rules and time-table govern between Storrs Jct. and Terminal Jct.

B. & O. rules and time-table govern between Ivorydale Jct. and B. & O. Jct., between RH Tower and Terminal Jct., and between North Vernon and North Tower.

Indianapolis Union rules govern between Washington and Noble Streets on the east and West Street on the west, and on the Belt R. R.

N. Y. C. & St. L. rules and time-table govern between Altamont and Templeton.

N. Y. C. rules and time-tables govern between South Bend and Goshen.

C. C. C. & St. L. rules and L. & J. B. and R. R. special instructions govern between North Tower and Floyd St.

Short Route rules govern between Floyd St. and Louisville.

Ohio Division time-table governs between Springfield Yard and Cold Springs, and West End and Durbin.

Erie rules and time-table govern between Durbin and Cold Springs.

DEFINITIONS.

Medium Speed—A speed not exceeding 30 miles per hour.

Restricted Speed—A speed not exceeding that which will enable a train to stop short of train ahead, obstruction, switch not properly lined, and look out for broken rail.

Slow Speed—A speed not exceeding 10 miles per hour.

1. STANDARD TIME.

Eastern Standard Time is used between Cincinnati and Wade.

Central Standard Time is used west of Wade and west of Cold Springs.

14. ENGINE WHISTLE SIGNALS.

- | Sound | Indication |
|-----------|---|
| (k) — o o | (Single Track) To call the attention of yard engines, extra trains or trains of the same or inferior class or inferior right, to signals displayed for a following section. If not answered by a train, the train displaying signals must stop and ascertain the cause. |
| | (Two or More Tracks) To call the attention of yard engines, extra trains or trains of the same or inferior class moving in the same direction, to signals displayed for a following section. |
| (g) — o | When running against the current of traffic: |
| | (1) Approaching stations, curves, or other points where view may be obscured. |
| | (2) Preceding the signals prescribed by Rule 14(d), (e). |

16. COMMUNICATING SIGNALS.

- | Sound | Indication |
|-----------------|-----------------------------------|
| (m) o o o o o o | When running—shut off train heat. |

17. HEADLIGHTS.

Must be dimmed:

- (a) Passing through yards where yard engines are employed.
- (b) Approaching stations at which stops are to be made or where trains are receiving or discharging passengers.
- (c) Approaching train order signals, junctions, terminals, or meeting points, or while standing on main track at meeting points.
- (d) On two or more tracks when approaching trains in opposite direction.
- (e) When closing up behind trains.

19. MARKERS.

A train not equipped to display markers as prescribed by Rule 19 will display red flag by day and red light by night.

Between sunset and sunrise a red light must be carried on rear of last car of all cuts occupying main track within yard limits.

21. EXTRA TRAINS.

Extra trains and work extras will omit the display of white signals on two or more tracks.

Extras and work extras passing from single to double track may continue the display of white signals to the point on double track to which such train is authorized to run or work extra.

28. MAIN TRACK SWITCHTENDERS.

At Sharon Ave., Sharon Yard, trains and engines must approach crossover at Restricted Speed and be governed by signal from switchtender, who will use green signal for main track movements and yellow signal for crossover movements.

At Storrs Jct. trains and engines must approach crossovers at Restricted Speed and must not foul or use the crossovers without signal from switchtenders, who will use green signal for main track movements and yellow signal for crossover movements. Before accepting a signal, it must be known that switches are properly lined.

At Bates St., and crossovers between ice-house and yard office Hill, Indianapolis, trains and engines must approach switches at Restricted Speed and be governed by signal from switchtender, who will use green signal for main track movements and yellow signal for diverging or crossover movements.

72. SUPERIORITY OF TRAINS.

The superior direction of trains is east or north.

83. TRAIN REGISTERS.

Cincinnati.....	Telegraph office.
Greensburg.....	Telegraph office.
Indianapolis.....	Telegraph office.
Kankakee.....	Telegraph office.
Goshen (CX).....	Telegraph office.
Wabash.....	Telegraph office.
Anderson.....	Telegraph office.
South Anderson.....	Telegraph office.
North Vernon.....	Telegraph office.
Springfield Yard.....	Telegraph office.
Springfield.....	Telegraph office.
Cold Springs.....	Telegraph office.
Lynn.....	Telegraph office.
Eastside.....	Telegraph office.
Fairland.....	Telegraph office.

Fairland—Only Nos. 53, 54, and 354 will be registered.

Wabash and Lynn are register stations only for trains for which they are initial or terminal stations.

Goshen (CX) and Cold Springs—Trains will be registered by the operator if signals for a section are not and have not been displayed.

South Anderson—Nos. 37 and 38 will be registered by the operator if signals for a section are not and have not been displayed.

Trains will be registered at intermediate register stations by the operator, except when a train is displaying signals for a following section it must stop at intermediate register stations and be registered by the conductor unless relieved of that duty by train order.

Enginemen are relieved from examining register except when they act as pilot or have no conductor, but this does not relieve them from knowing whether all trains due, which are

superior or of the same class, have arrived or left, before leaving a register station.

CLEARING OF TRAINS.

Greensburg—Northbound and southbound trains must not leave without Clearance Form A.

Anderson—First class trains must not leave without Clearance Form A, except during hours Train Order and Block Station is closed.

Cold Springs—Westbound trains are relieved from receiving Clearance Form A.

85. MOVEMENT OF TRAINS.

Trains of one schedule may pass trains of another schedule of the same class, and extra trains may pass and run ahead of second class and extra trains.

91. SPACING TRAINS.

On portions of the road where no other form of block system is used, under the operation of Rule 91 it will be the duty of operators and signalmen to display the train-order signal at Stop until ten minutes after the departure of a train carrying passengers, and until five minutes after the departure of any other train. They must not deliver and trainmen must not accept any form of Clearance until the time limit has expired.

93. YARDS.

Within yard limits the main track may be used protecting against first class trains. Other trains and engines must move within yard limits prepared to stop unless main track is seen or known to be clear.

Movements against the current of traffic within yard limits must be made at Restricted Speed.

While on the main track of the Cincinnati or Indianapolis Terminal, a trainman must ride on last car of train or cut.

Unless otherwise provided, westbound freight trains and engines will move between Storrs Jct. and King via the Wall track. Normal position of Wall track switch at Storrs Jct. is for the Wall track.

Trainmen and yardmen must not block the current of traffic when it is possible to avoid doing so and must protect their trains or engines in accordance with the rules.

Between Smith St., Cincinnati and King, between Beech Grove and KD and between Eastwood and Mt. Jackson, movements will be made, irrespective of class, with the current of traffic and at Restricted Speed.

Between KD and Brant, when it is not practicable to obtain clear block, signalman at KD may display Permissive-signal, or may instruct signalman at Brant to display Permissive-signal to indicate block is occupied and that movements may be made at Restricted Speed.

Permission of signalman at Brant must be secured by telephone before entering block at Belmont Ave. and Michigan St., and report made to him when block is cleared. Trains and engines must move at Restricted Speed unless main track is seen or known to be clear. Otherwise, Manual Block System and Train Rules remain in force.

Trains and engines must expect to find the Beech Grove employees' train receiving or discharging passengers or about to stop for this purpose on either track at points between Beech Grove and State St., Indianapolis and when so found must come to a stop and then proceed at Slow Speed after giving warning signals. This train makes regular stops at Sherman Drive, Ice-house Crossover, Keystone Ave. and State St.

Between Court St. and I. C. junction, Kankakee, and between Kern and Rushville, movements must be made at Restricted Speed.

At Marion, trains and engines will approach the joint track at Restricted Speed and be governed by signal indication.

On curves approaching Wabash, freight trains and engines must move at Restricted Speed.

Lawrenceburg Jct. to Aurora both inclusive, and Connersville to Beeson both inclusive, are within yard limits.

MOVEMENTS AGAINST THE CURRENT OF TRAFFIC.

May be made between:

Sharon Ave., Sharon Yard and Ivorydale Jct. under supervision of yardmaster.

Smith St., Cincinnati and Storrs under supervision of yardmaster.

Storrs and King, and via the Wall track over the westward main, on signal indication under supervision of signalman at King.

Storrs Jct. and King westbound from C. U. T. or B. & O. under supervision of signalman at King and by message authority of the Superintendent.

Movements between KD and Brant will be supervised by signalman at KD, whose instructions must be obeyed by signalman at Brant. Movements may be made against the current of traffic when so authorized by Clearance Form Z and must be at Restricted Speed unless the main track is seen or known to be clear. Signalman at Brant must not issue this form except by authority of signalman at KD, who must not authorize such movement until control of block has been secured.

Eastwood and Belt Jct. on signal indication under supervision of signalman at Eastwood.

Pearl St., Anderson and South Anderson under supervision of yardmaster.

103. PUBLIC GRADE CROSSINGS.

Rule 103 is revised:

When placing cars for loading or unloading, they must, when practicable, not be left standing nearer than fifty (50) feet to any street or road crossing, and not nearer than one hundred (100) feet when placed in storage.

When cars are pushed by an engine, except when shifting or making up trains in yards, a trainman must take a conspicuous position on the leading car, and when shifting over public crossings at grade not protected by a watchman or by gates, a member of the crew must protect the crossing.

When a train pulls over a public crossing at grade and a back-up movement over such crossing is to be made, the crossing must be protected by a member of the train crew unless protected by a watchman or gates.

In switching passenger equipment air brakes must be used unless impracticable and cars which are occupied must not be uncoupled while in motion.

104. SWITCHES.

It must be known that switch rails are in proper position and in good order before and after using a switch.

Normal position of switch leading from main track to Belt wye at Eastside is for the wye.

221A. TRAIN ORDER SIGNALS.

The "wig-wagging" of train-order signal (or of home signal, or slow-speed signal used in lieu thereof) and its immediate return to normal position will indicate an approaching train or engine may proceed and pass signal at Restricted Speed prepared to receive train orders and Clearance Forms, but if not received in passing, the train or engine must be stopped immediately and not proceed until properly authorized. This does not authorize holding the main track on the time of a superior train except as may be provided in other rules or special instructions.

DESIGNATION AND USE OF MAIN TRACKS.

Single Track:

Between Greensburg and Clifty.

Vine and Dix.

Clarks Hill and Altamont.

Swanington and Kankakee.

Goshen and Pearl St., Anderson.

South Anderson and North Vernon.

Cold Springs and DX.

Valley Jet. and Beeson.

Lawrenceburg Jct. and Aurora.

Greensburg and Columbus.

Fairland and Martinsville.

Double Track:

Between Smith St., Cincinnati and Greensburg.

Clifty and Vine.

Dix and Clarks Hill.

Templeton and Swanington.

Pearl St. Anderson and South Anderson.

251. MOVEMENT OF TRAINS BY BLOCK SIGNALS.

Between Gano and Ivorydale Jct.

King and Noble St., Indianapolis.

KD and Altamont.

Templeton and Court St.

DX and Mass. Ave., Indianapolis.

Washington St., Indianapolis and Mass. Ave. eastward track.

Yost and Kern.

Rushville and North Vernon.

Rules S-251 to S-254 inclusive govern on single track.

Rules D-251 to D-254 inclusive govern with the current of traffic on double track.

In Manual or Automatic Block territory when a train or engine takes siding or otherwise clears the main track, it must not again enter the block or foul the main track without permission of the signalman or dispatcher.

At points where outlying switches are remote control, trains will be governed by signal indication.

301. MANUAL BLOCK SYSTEM.

The Manual Block System will be used:

Between-Greensburg and Dix.

KD and Brant.

Clarks Hill and Altamont.

Templeton and Court St.

Yost and Dow.

South Anderson and Kern.

Rushville and North Vernon.

Rule 317A governs the movement of passenger trains on single track, 318A on double track, and 331A on single and double track.

Rule 317B governs the movement of freight trains on single track, 318B on double track, and 331B on single and double track.

A proceed indication displayed on home signal at closed block or interlocking station will not supersede or modify the block signal indication or instructions received at last open block station.

Indications of manual block signals will convey to second class and extra trains information as to condition of that portion of the block that is not within yard limits. Second class and extra trains must move within yard limits prepared to stop unless main track is seen or known to be clear.

Manual block signals at Yost, Grandy, 1 mile north and 1 mile south of Wabash, Alda, 1 mile south of South Anderson, Knox, Boyd, Kern, 1 mile north of Greensburg, Craig, Horace, and 1 mile north of North Vernon are remote control. Trains must not pass these signals without entire train, or to do switching, without first notifying the controlling operator of intended moves, and must report to the controlling operator as soon as such moves have been completed.

Northbound trains and engines must not foul the main track north of North Vernon telegraph office without permission of the operator.

At stations where train order and block signal is located beyond switch at entrance to siding, trains finding signal indicating stop must not pass clearance point of siding until authorized to proceed.

Opposing trains which are to take siding at such stations may pass train order and block signal in stop position to enter siding under flag protection after receiving Clearance Form A.

This does not modify the Manual Block Rules.

501. AUTOMATIC BLOCK SYSTEM.

The Automatic Block System will be used for movements with the current of traffic:

Between-Gano and Ivorydale Jet.

Sixth St. and Carr St., Cincinnati, westward track.

King and Greensburg.

Dix and Noble Street, Indianapolis.

Brant and Clarks Hill.

Pearl St., Anderson, and South Anderson.

DX and Mass. Ave.

Washington St. Indianapolis and Mass. Ave., eastward track.

Dow and Pearl St., Anderson, single track.

The Manual Block System will be used for movements against the current of traffic:

Between-Storrs and Greensburg.

Dix and Beech Grove.

Brant and Clarks Hill.

Rule 501B is revised:

Indication—Proceed at a speed not to exceed one-half the maximum authorized at point involved (not exceeding 30 miles per hour) prepared to stop at next signal. Name—Approach Signal.

Rule 501E is revised:

Indication—Approach next signal at Medium Speed.

COLOR LIGHT SIGNALS.

The indications displayed by color light signals are the same as the indications of the same aspects displayed by night aspects of semaphore signals as shown in Book of Rules.

Red lights, diagonally displayed, indicate "Stop"; then proceed at Restricted Speed.

GRADE SIGNAL.

A yellow light displayed in a vertical line with the automatic block signal light.

Indication—Proceed at Restricted Speed.

REMOTE CONTROL SWITCHES.

Location		Release
Glenn	West end of westward siding	Dual control.
	East end of eastward siding	Dual control.
Dale	West end of westward siding	Dual control.
	East end of eastward siding	Dual control.
Hazelrigg	West end of westward siding	Dual control.
	East end of eastward siding	Dual control.
Colfax	East end of eastward siding	Dual control.

Instructions for manual operation of each remote control switch are posted in telephone box.

Instructions for manual operation of each remote control switch are posted in telephone box.

When a remote control switch equipped with dual control lever fails, the switch must, regardless of position of switch points, be thrown by hand in accordance with instructions.

When a remote control switch not equipped with dual control lever fails, the switch must, regardless of position of switch points, be cranked to desired position. If after cranking switch machine the signal does not indicate Proceed, switch must not be used in facing direction without spiking or blocking switch points.

CLOSED INTERLOCKING STATIONS.

At a closed interlocking station, should signal for an open route indicate "Stop", movements through the interlocking must be preceded by a flagman. When practicable, permission must be obtained from train dispatcher before proceeding. It must be known that the route is properly lined and signalman is not on duty.

601. INTERLOCKING SIGNALS.

Rule 601D is revised:

Indication—Proceed at Medium Speed prepared to stop at next signal.

Rule 601F is revised:

Indication—Proceed at Medium Speed.

747. SIDING SWITCHES.

At Fairland and Donovan, trains taking siding will pull in at first switch.

752. COALING ENGINES.

Engines will not be coaled while passenger trains or engine or caboose of freight trains are passing on adjoining track.

790. REDUCE SPEED BOARD.

Location—Upon the right of and adjoining the track to which it refers, approximately 6,000 feet from the point to be protected.

Indication—Approach Slow Speed Board at not exceeding speed shown on Reduce Speed Board.

Note—Flags of prescribed color may be substituted for the Boards when necessary.

When yellow Flags are substituted, or the Reduce Speed Board does not designate the speed limit, speed must be reduced to 10 miles per hour.

Lights of the prescribed color must be used by night in addition to the Boards or Flags.

PASSING TRAINS.

Observance of passing trains by employes and code of signals to be used:

When trains are passing other trains or open signal stations, trainmen must observe the general condition of trains on other tracks and receive and acknowledge signals.

When trains are standing, trainmen must place themselves in the best possible position to observe the running gear of passing passenger trains, and when other duties do not interfere, the same observation must be made of passing freight trains.

The forward trainmen of freight trains, and enginemen and firemen when practicable, must be on the lookout for signals from the rear after meeting or passing trains, also when approaching and passing stations and trackmen, and frequently at other points.

When trains are passing, signalman, operator or leverman, whenever practicable, must observe from station platform, or ground, the condition of the train for its entire length. Trackmen, bridgemen, signal maintainers, pumpers and other employes must make similar observations.

If any indication of conditions endangering a train is observed, "Stop" signal must be given. If there are no apparent defects, employes, except crossing watchmen, must give "Proceed" signal.

Hot Journals.

By day: Hold nose with finger and thumb of one hand and point down toward track with the other.

By night: Swing lamp in small vertical circle; lamp to be held by guard wires.

Connections Dragging.

By day or night: Give "Stop" signal.

Car Door Swinging.

By day: Raise and lower right hand slowly full length of body.*

By night: Same signal to be given with lamp.*

*In addition, give "Stop" signal.

Brakes Sticking.

By day: Shove hand in sliding movement out from body.*

By night: Same signal to be given with lamp.*

*In addition, give "Stop" signal to freight trains.

Flat Wheels.

By day: Place palms of hands together in horizontal position.

By night: Hold lamp in horizontal position at arm's length.

All Clear.

By day or night: "Proceed" signal.

All signals must be acknowledged.

SPEED RESTRICTIONS.

Speed restrictions are shown in miles per hour and apply to entire train.

Between Lawrenceburg and Aurora—	

In double heading or when being towed engines must be separated by not less than 2 empty cars.

Steam cranes must be separated from engine by not less than 2 empty cars.

CONTAINER CARS.

Trainmen in performance of their duties are not required to pass over the tops of containers.

LOCOMOTIVE CRANES.

Whenever possible, locomotive cranes handled in trains will be run with the heavy end forward.

HELPER ENGINES.

A helper engine must not couple onto either head or rear of train it is to help until such train is stopped. Helper engines must not push trains beyond the summit of the grade. If helper engine is to continue in the same direction in automatic block territory it may proceed complying with the automatic block rules, and in manual block territory it may proceed with caution

prepared to stop short of any obstruction to the next block station, where the block rules must be complied with.

Limits of Wabash helper engine are between mile posts 110 and 116; it will help any train within its limits and return to Wabash against second-class and inferior trains, running extra, without train orders.

AIR BRAKES.

When a failure renders the brakes on both train and engine inoperative, the train may proceed with extreme care to the first siding where it will await relief engine.

If the failure involves the brakes on the train or a part of the train, leaving the brakes on the engine operative, the train may be moved with extreme care at a speed at which the train may be stopped short of any obstruction with the available braking power. Weather and other conditions must be such as to insure the safety of the movement. If a relief engine is necessary it must be provided at the first possible point.

If the conditions are not extremely favorable the train must be side tracked until relief engine is provided.

HANDBRAKE TEST.

A running test of handbrakes must be made on a rail motor car upon leaving initial terminal when operating as a single unit as soon as speed permits, enginemen to shut off power and signal for brakes. The conductor or member of train crew will then apply handbrake to determine if same is operating properly. In case handbrake does not operate properly, proceed with caution to the nearest point at which repairs can be made.

STOPPING TRAINS FROM REAR.

When necessary to make an emergency application of the brakes from rear of train account of derailed car, connections dragging, broken truck, etc., conductor's valve must be opened quickly. In case other than extreme emergency:

Trains of less than 75 cars running at a speed of 15 miles per hour or less: Open valve slowly, consuming 90 seconds.

Trains of less than 75 cars running at a speed of more than 15 miles per hour: Open valve slowly, consuming 60 seconds.

Trains of 75 cars or more running at a speed of 15 miles per hour or less: Open valve slowly, consuming 2 minutes and 20 seconds.

Trains of 75 cars or more running at a speed of more than 15 miles per hour: Open valve slowly, consuming 80 seconds.

In each case valve must not be closed until train has come to a full stop.

MIXED TRAINS.

Mixed trains carry passengers and must stop coach (or caboose) at station platform.
