INSTRUCTIONS

1. Weather conditions and temperature should be reported at least once a day during the six months Feb. to Sept. inclusive, and at least twice a day during the six months Oct. to Mar. inclusive, at points where operators are on duty.
2. Track, bridge, structures, shall be kept in such condition that no delay will result to any train, and report made to the office of the superintendent of any such condition which may be found to exist.
3. Delays to trains must be reported to the office of the superintendent within one hour after the train has been delayed, or a report made that no delay has occurred.
4. Operators at stations where no train is scheduled to work shall report to the office of the superintendent within one hour after the time they should have reported for duty, if they do not report for duty.
