First class trains must clear the time of Nos. 1, 49, 101, 103 and 111 not less than ten minutes; all other trains must clear the time of Nos. 1, 49, 101, 103 and 111 not less than fifteen minutes.

No. 87 will stop at Jefferson, Denison and Logan to receive revenue passengers for Salt Lake City, Ogden or beyond Granger.

No. 87 will stop at Jefferson, Denison and Logan to receive revenue passengers for Salt Lake City, Ogden or beyond Granger.

No. 5 will not carry passengers

No. 717 will stop at Jefferson and Denison to discharge revenue passengers from Chicago and beyond including passengers holding stock drovers tickets and to receive revenue passengers for Council Bluffs and beyond, at Logan to receive revenue passengers for Salt Lake City, Ogden or beyond Granger, and at Missouri Valley to let off revenue passengers from Clinton and beyond, destined to Onawa and beyond.

No. 27 will stop at Carroll to receive revenue sleeping car passengers for Granger and beyond.

# BETWEEN COUNCIL BLUFFS AND BOONE.

L-W. or B. 3

**★No. 2 will run only on the following dates**

Due to leave Omaha on the 3rd, 9th, 15th, 21st and 27th of each month.

\*No. 102 will run only on the following dates:

Due to leave Omaha on the 4th, 10th, 16th, 22nd and 28th of each month.

\*No. 104 will run only on the following dates:

Due to leave Omaha on the 2nd, 5th, 8th, 11th, 14th, 17th, 20th, 23rd, 26th and 29th of each month.

\*No. 48 will only run on the following dates:

Due to leave Omaha on the 1st, 7th, 13th, 19th, 25th and 31st of each month.

First class trains must clear the time of Nos. 2, 48, 102, 104 and 112 not less than ten minutes; all other trains must clear the time of Nos. 2, 48, 102, 104 and 112 not less than fifteen minutes.

No. 6 will not carry passengers.

No. 28 will stop at Carroll to discharge revenue passengers from Granger and beyond.

No. 22 will stop at Dunlap to let off passengers from Omaha and to receive revenue passengers for East of Boone.

No. 88 will stop at Logan, Woodbine, Glidden, Scranton and Grand Jct. to receive revenue passengers for points where this train scheduled to stop.

Trains operating between Manning and Harlan operate over the tracks of the Chicago Great Western Railroad and are governed by the rules and time table of that railroad. When using C. & N. W. tracks at Botna, Irwin, Kirkman and Harlan, trains will be governed by Rule 93—Amended.

Passenger train back-overs between Coach Yard and Broadway Station, Council Bluffs, will operate as follows:

| Train No. | Coach Yard | Broadway   |
|-----------|------------|------------|
| 48.       | 3:05 a. m. | 3:10 a. m. |
| 12.       | 6:35 a. m. | 6:40 a. m. |
| 204.      | 7:30 a. m. | 7:35 a. m. |
| 121.      | 7:30 a. m. | 7:35 a. m. |
| 14.       | 7:55 a. m. | 8:00 a. m. |
| 115.      | 3:40 p. m. | 3:45 p. m. |
| 6.        | 5:05 p. m. | 5:15 p. m. |
| 22.       | 6:10 p. m. | 6:15 p. m. |
| 28.       | 7:05 p. m. | 7:10 p. m. |
| 18.       | 7:35 p. m. | 7:40 p. m. |
| 818.      | 7:40 p. m. | 7:45 p. m. |
| 88.       | 7:45 p. m. | 7:50 p. m. |
| 202.      | 8:00 p. m. | 8:05 p. m. |

All freight trains, engines and switch trains will give back-over trains an absolutely clear track.

General Rules governing employees of the Operating Department, dated December 1st, 1929, are issued in book form.

Every employee whose duties are in any way prescribed by these rules, must always have a copy of them at hand when on duty.

## SIGNS AND LETTERS.

The following signs when placed before the figures of the schedule indicate:

s—Regular stop.

f—Flag stop to receive or discharge passengers or freight.

When placed before the figures of the schedules the following will indicate:

M—Meals

N—Luncheon.

Other letters will indicate conditional stops as specified by time table.

The following signs when placed elsewhere indicate:

F—Fuel.

Y—Wye.

W—Water.

CS—Communicating station.

TT—Turntable.

During fogs or bad storms in Chicago Terminals and other congested districts, freight and switch engine movements should be kept off the main lines entirely so far as practicable. When movements are absolutely necessary, full protection must be given by flagman using fuses and other signals.

Under the conditions above mentioned delays are expected, and it should be understood by all that "Safety" is the first consideration.

Enginemen, trainmen and other employees are warned that on the road, at stations, in yards and on industrial tracks, there are bridge girders, fences, buildings, structures and obstructions which, owing to local conditions or requirements, do not give clearance to men on top of or on side of car.

They must familiarize themselves by personal observation with these conditions existing in the district in which they are employed, and must not extend any part of their bodies out from the engine or cars of any train, or attempt to alight therefrom while passing these obstructions. New employees must exercise great care in this respect.

Mail cranes are located at various stations for the purpose of hanging mail to be picked up by passing trains and the clearance of the arm of the crane when mail sack is hung, varies in distance according to the size of locomotive. Enginemen and Trainmen are warned that in passing through station grounds they must be careful not to extend any part of their bodies out of the cab window while passing these mail cranes.

## SPECIAL RULES.

Standard Time 1. Clocks showing Central Standard time are located at: Boone—Train Dispatchers Office; Yard Office, and Round House. Carroll—Telegraph office.

Missouri Valley—Yard Office.

Council Bluffs—Passenger station, Yard Office, Round House.

Superior Direction 2. EASTWARD trains are superior to WESTWARD trains of the same class.

Rule S-72

Registering 3. Boone Train Dispatchers' Office; all first class trains. Stations Missouri Valley, Maple River and Carroll; all trains terminating or originating at these points.

Manning; all trains.

For eastward trains on Iowa Division and from Sioux City Division a clear train order signal displayed at Maple River will indicate that all overdue first class trains have departed.

Bulletin Boards 4. Bulletin Boards are located as follows: For Conductors, Trainmen and Yardmen—

Boone Yard Office, Boone Office Building, Carroll Yard Office, Mo. Valley Yard Office, Council Bluffs Yard Office, Council Bluffs Passenger Station.

For Enginemen and Firemen—Boone Round House, Carroll Round House, Mo. Valley Round House, Council Bluffs Round House.

Trains Obtain Clearance 5. All trains starting from or entering two or more track districts at any point between Boone and Council Bluffs will obtain Clearance Form A at such stations. The above will permit operators to accept train orders for such trains without display of train order signal. This rule will not apply at stations where telegraph office is closed.

Two Tracks 6. Two tracks are in operation between Boone Freight Yard and Council Bluffs.

Train Orders 7. In two or more track districts extra freight trains will be operated Rule D-97a without train orders.

## BLOCKING.

Automatic 8. The main tracks between Boone and Broadway Station, Council Train Speed Bluffs, are equipped for continuous automatic train speed control. Control

Exceptions—as authorized by Rule 513—amended.

Each employee must be fully conversant with information and instructions contained in Booklet No. 4 dated September 15, 1929 and special instructions pertaining to automatic train speed control and these instructions must be observed.

Engines not equipped for Train Control and terminating at Carroll, in service to and from the Sioux City Division may be operated at a speed not to exceed 20 miles per hour between Carroll and Maple River.

Automatic Home and Distant Signals A290, 290, 292, 294, 295 and 297, located between Maple River interlocking plant and Carroll passenger station. Block Wayside Signals

Time Spacing Rules 380 to 382 govern between Carroll and Audubon, and trains will be spaced 15 minutes apart. Rule 91

## CLASS H ENGINES

Class H Engines may use the westward passing track at Glidden, Carroll, West Side, Denison, Dunlap and Missouri Valley.

Class H Engines may use the westward passing track at Honey Creek for a distance 600 feet East of the frog.

Class H Engines may use the eastward passing track at Missouri Valley, Dunlap, Denison, Scranton and Grand Junction. May turn on Wye at Missouri Valley.

Class H Engines must not use passing tracks not mentioned above, or house tracks, industry tracks, storage track or stock tracks, not authorized by bulletin instructions, and when necessary to work on these tracks a sufficient number of cars will be handled to avoid having the Engine operate beyond the turnout.

Class H Engines are equipped with an emergency, high-powered red light located above the regular headlight on front end of engine. The following rule will be observed when operating in either freight or passenger service:

In every case where the air brakes are applied from any cause other than by normal operation of train-control apparatus, or the engineman himself; or when the engineman finds it necessary to stop his train due to some defect or under circumstances which might cause derailment and thereby foul the adjoining main track, engineman will immediately turn on the emergency red light; and when this is done, enginemen on approaching trains on adjacent tracks will take notice and immediately bring their train to a stop, and proceed only after finding track clear. This rule is applicable at all times, both day and night. This emergency red light must not be used for any other purpose.

The operation and use of this device will in no way relieve enginemen or trainmen from complying with the last paragraph of Rule 102.

In case of a headlight globe failure on Class H locomotives in passenger service, the high powered red light may be cleared to a white light by breaking the seal and adjusting the shutter, and the engine may proceed operating this light as an emergency headlight.

When train is proceeding, using the high powered light as an emergency headlight, at any time when conditions require the use of the red light, the engineman will immediately adjust the shutter to the red position, and he must, on arrival at the first terminal where repairs can be made to the headlight, report the seal broken on the shutter of the emergency red light, and have it resealed in the red position.

Spring Switches 12. Spring Switches from passing track to main line are located at the following points. Rules 104f, 104g, 510a, 512a and 512b will be observed and speed will be restricted as follows:

| LOCATION        | DIRECTION | MILES PER HOUR     |
|-----------------|-----------|--------------------|
| Glidden         | Westward  | Engine 10 Train 25 |
| Carroll         | Westward  | " 10 " 25          |
| West Side       | Westward  | " 10 " 25          |
| Denison         | Westward  | " 10 " 25          |
| Denison         | Eastward  | " 10 " 25          |
| Dunlap          | Eastward  | " 10 " 15          |
| Dunlap          | Westward  | " 10 " 15          |
| Missouri Valley | Westward  | " 10 " 25          |
| Missouri Valley | Eastward  | " 10 " 25          |

## ADDITIONAL SPEED RESTRICTIONS.

## FOR ALL TRAINS AND ENGINES.

**Diesel Motor Drawn Trains.** Power must observe speed restrictions of Trains handled by Steam Power.

The speed of a train or engine moving over a cross-over, turn out from main track to siding or diverging route at a Junction, must not exceed 10 miles per hour, unless specifically authorized under Speed Restrictions.

Trains operating against the current of traffic will restrict speed to twenty miles per hour.

When Two or More Tracks are operated as single track, trains operating against the current of traffic and trains operating with the current of traffic in such single track district will approach both terminals of such single track operation at not exceeding ten miles per hour.

Trains moving against the current of traffic in Two or More Track districts will restrict speed to ten miles per hour over dangerous highway crossings, including crossings equipped with automatic signal protection, or within the limits of any city.

Light engines or engines with caboose or coach only will restrict speed to 15 miles per hour over street or highway crossings in any city, town or village.

Trains or engines will restrict speed to ten miles per hour when entering or leaving a siding, moving through a cross-over, or diverging route at a junction except as authorized under speed restrictions.

Speed of class H Engines must be restricted to ten miles per hour when entering or leaving sidings, when moving through sidings, cross-overs, slip switches, engine house and yard tracks.

No. 5 will restrict speed to twenty miles per hour at Grand Junction, Jefferson and Denison to dispatch mail. On Sundays only will restrict speed to ten miles per hour at Denison to dispatch mail.

Unless otherwise instructed, steam wrecking outfits must not exceed a speed of 35 miles per hour between Boone and Council Bluffs, and will not be operated on Sub-division 3a without special speed restrictions.

10. **Crossings, Junctions and Draw-Bridges, at which Rules 601A to 672 will be observed:**

|                       |                      |
|-----------------------|----------------------|
| C. & N. W.....        | Eighth Street, Boone |
| C. & N. W.....        | Boone Viaduct        |
| M. & St. L.....       | Grand Junction       |
| C. M. St. P. & P..... | Jefferson            |
| C. & N. W.....        | Maple River          |
| C. M. St. P. & P..... | Arion                |

In addition to observing Rules 601A to 672, all trains will approach the signal and gate protected railroad crossings and draw-bridges shown below at restricted speed. If clear indication is given, the engine or leading car must not exceed a speed of 15 miles per hour passing the home signal:

C. & N. W..... Avenue C, Council Bluffs

In addition to observing Rule 98, Rules 601A, 601G—Amended and 672 Amended must also be observed at the crossing shown below:

C. B. & Q. R. R..... 12th Street, Council Bluffs

Rail motor cars, gas or oil-electric, when operated without a trailer car attached must come to a full stop at the home signal of an automatic interlocked railroad crossing, regardless of whether the signal is clear or not. If the signal indicates "Proceed," the car may proceed after the stop is made, otherwise the release apparatus at the crossing must be operated in accordance with the second paragraph of Rule 672.

**Train Inspection** 13. Freight trains will stop and make inspection at the following points: **WESTWARD** EASTWARD  
Carroll Mo. Valley, Dunlap or Denison  
Denison or Dunlap Carroll

All freight trains will make inspection of their trains when a stop is made for coal or water at points other than specified above.

All eastward trains except streamline trains will make running inspection of their trains east of station platform at Ogden.

**Air Brakes** 14. All cars in trains leaving terminals must be equipped with air brakes and in operation.

**At Council Bluffs** 15. All train movements west of the double cross-overs located between Ave. B and C, east of Council Bluffs, will be operated as right hand normal direction of traffic.

**Between Co. Bluffs and Omaha** 16. When operating over the Union Pacific in Council Bluffs, Omaha and South Omaha yards, each member of train and engine crews must have a copy of and be governed by Union Pacific Rules, Bridge Subdivision Special Rules, and Bridge Subdivision time table.

**At Missouri Valley** 17. Sioux City Division passenger trains stopping at Missouri Valley, will come to the platform on Sioux City Division side. Crews of freight trains and yard engines will be held responsible for keeping clear of passenger trains operating between Tower Z and the west wye at Missouri Valley. This will not relieve crews on such passenger trains from properly protecting their trains.

**At Maple River, and Mo. Valley** 18. Iowa Division trains using Sioux City Division tracks at Maple River and Missouri Valley will do so under flag protection.

**Double Heading Passenger Trains** When for any reason it is necessary to double head passenger trains, the regular passenger engineman and engine will be placed in the lead. However, if it is inconsistent to place the passenger engine ahead, the enginemans will change engines in order that the regular engineman will be on the lead engine.

**Disabled Passenger Engines** In case of passenger engine failure, and another engine is substituted, either passenger or freight engine, the engineman of the disabled engine will take the engine that is furnished for relief, leaving the disabled engine with the engineman whose engine is used to replace the disabled engine.

**Cleaning Ash Pans** 19. Ash pans may be cleaned at the following places:  
Grand Junction..... Penstock  
Scranton..... Penstock  
Carroll..... Penstock  
West Side..... Water Tank  
Dunlap..... Water Tank

**Sprinkling Hogs Rule 731** 20. Conductors will see that Rule 731 is observed and that record is kept on their wheel report showing stations at which each car of hogs is sprinkled and condition of hogs when taken and left. Hog sprinkling devices are located at:

Boone Freight Yard. Carroll Dunlap  
Grand Junction West Side Mo. Valley

**Use of Sand** 21. The use of sand is prohibited on all Interlocking Plants anywhere between the Home Signals; also prohibited between the fouling point and switch points on any turn-out connected with main line in automatic block, automatic train control or centralized control districts, and must not be used on any spring switch between the fouling point and switch point. Sand is an insulator and its use on the rail may result in the improper functioning of signal or interlocking apparatus.

**Whistling** 23. Railroad companies shall not cause or allow the whistle of any locomotive engine to be sounded within the city limits at Boone, Ogden, Grand Junction and Council Bluffs except for the purpose of making such signals necessary for train intercommunication or to prevent injury to persons.

**Whistling Streamline Trains** Enginemen operating Streamline trains when sounding regulation crossing whistle, will begin sufficiently in advance of the whistling post location. Whistle must be sounding while engine is approaching and passing over crossing.

**Dispatchers Telephones** 24. Dispatchers telephones are located in waiting rooms at all stations, and, or in the following locations:

Ogden.—Box east of baggage room door. Mo. Valley.—East end of yard.  
Jefferson.—Box in baggage room. Carroll.—At coal shed. West end Westward passing track.  
West end Westward passing track. Co. Bluffs.—East end of yard.  
Dunlap.—Box in baggage room. Omaha.—Yardmasters office.

## INSTRUCTIONS TO FREIGHT CONDUCTORS, AGENTS AND YARDMASTERS.

## WESTWARD

No. 117 will handle time freight for Mo. Valley and beyond and for Un. Pacific Co. Bluffs.

No. 251. The Roundup will handle Denver and other Union Pacific freight.

No. 253. The Dispatch will handle Pacific Coast Time freight.

All westward freight trains except Nos. 251 and 253 will fill out at Missouri Valley unless otherwise instructed by train dispatcher.

## EASTWARD

No. 254 will handle time freight, stock and meat out of Council Bluffs, will pick up at Mo. Valley stock and time freight from Omaha, Sioux City and lines west, and at Carroll stock and time freight from Sioux City Division.

## ACTUAL TONNAGE RATINGS.

| DISTRICT                       | CLASS OF ENGINE |       |       |       |      |       |
|--------------------------------|-----------------|-------|-------|-------|------|-------|
|                                | H               | J     | J-A   | Z     | R-1  | S     |
| Boone to Carroll.....          | 4815            | 3700  | 3900  | 3060  | 1650 | ..... |
| Carroll to Arcadia.....        | 3780            | 3100  | 3300  | 2550  | 1300 | ..... |
| Arcadia to Council Bluffs..... | 5850            | 4800  | 5000  | 4000  | 2500 | ..... |
| Council Bluffs to Boone.....   | 5000            | 3500  | 3750  | 2900  | 1600 | ..... |
| Carroll to Manning.....        | .....           | ..... | ..... | ..... | 1000 | 600   |
| Manning to Audubon.....        | .....           | ..... | ..... | ..... | 700  | 600   |
| Audubon to Manning.....        | .....           | ..... | ..... | ..... | 1000 | 600   |
| Manning to Carroll.....        | .....           | ..... | ..... | ..... | 1000 | 600   |

The above ratings are the maximum tonnage, exclusive of caboose, that will be handled over the maximum grades under ordinary conditions. However, additional tonnage will be handled whenever the circumstances and grade will permit.

Cars loaded with merchandise will be rated at four (4) tons per car, plus the actual weight of the car.

In computing gross tonnage of freight trains, the actual stenciled weight of freight equipment must be used in arriving at the gross tonnage of loaded or empty cars, both foreign and home cars; use even ton weights for each car. When the odd weight is over 1000 pounds it will be counted as one ton; when the odd weight is less than 1000 pounds it will not be used in computing tonnage. When the stenciled weight on a car is not legible, or there is no stenciled weight, the weight of cars of similar class and construction will be used.

When engines are unable to haul their rating the tonnage may be reduced on information from the engineman, who will assume the responsibility for reduction made and who will also wire train dispatcher the reasons therefor.

Scheduled trains will be required to haul such tonnage as will enable them to make schedule running time. Trains are not required to double hills except in compliance with instructions or in unforeseen causes.

To secure full tonnage, 15 tons more than rating rather than under rating will be hauled.

Except as above the train dispatcher will determine the tonnage to be hauled.

When double-header engines are used, the larger one must be placed next to the train except when otherwise authorized.

With trains of over forty (40) cars, exclusive of caboose, double-heading is prohibited, except as hereinbefore stated: Double-headers may be run in any district providing the rating of the largest engine handling the train is not exceeded. In case of an accident to an engine, consolidation may be effected with another train and consolidated train brought into terminal as double-header if practicable.

In making out way-bills, Agents will insert the gross weight in tons (car and contents) of each carload shipment on the way-bill. Do not show fractions of tons; less than 1,000 pounds to be dropped; 1,000 pounds or over to be counted one ton.

When moving Company material, such as bridge outfit, scrap, ties, etc., under special instructions without way-bills, Conductors and Agents will make careful estimates of the weight of contents.

Yardmasters will at all times make up trains in accordance with the above instructions.

## ESTIMATED WEIGHTS OF C. &amp; N. W. CARS.

| Passenger Equipment         | Wood Tons | Steel Tons |
|-----------------------------|-----------|------------|
| Coaches, non-vestibule..... | 32        | 57         |
