OBJECTIVES

Our Freight Train Service is set up to provide a dependable and fast transportation product. A railroad, by nature, can best perform its function on a wholesale basis. By so doing we reduce our unit costs and provide a service that our competition will find difficult, if not impossible, to meet. Dependability of service is far more important than speed, but for traffic that does put a premium on speed, the factor of dependability is on a par with speed. These concepts must be kept in mind constantly by all concerned in the operation and marketing of our freight train service if we are to be successful in providing the **best and most profitable service possible.**

All freight is important and in making up a train the service objectives of the train itself must be kept in mind. If traffic is moved according to the classifications and obligations shown herein it will receive a preferred movement regardless of the type of freight it might be. We earnestly solicit comments and suggestions as to how improvements can be made in our service. The goal of dependable, fast and profitable service can only be attained if each employee concerned cooperates in the best manner in which he is capable.

GENERAL NOTICE

1. These instructions show regular through freight service, classification, connections, and other data. The times shown herein are for information only and provide no timetable authority. All times are for purposes of this booklet only.
2. It is required and expected that all employees responsible for the make-up, classification and dispatching of freight trains familiarize themselves with these instructions.
3. The various classification groups shown herein refer to obligation traffic.
4. Traffic must be grouped in order of preference shown.
5. Empty meat refrigerator cars of AAR designation "RSM" or "RPM", empty TOFC cars, TOFC cars with empty trailers, empty automobile cars whether box, Bi or Tri-level flats are considered as loads and must be classified and moved as such.
6. Changes in through trains or the make-up thereof shall be made by issuance of instructions on authority of the Manager of Operation. These instructions will be furnished on sheets to be inserted in this book to replace the former instructions.
7. Day-to-day curtailments in or additions to, service may be made by division forces provided advertised service is protected.
8. The method of reporting arrival and departure of trains at terminals is as follows:
Arrival - Time train stops on main track or in yard. TOFC trains arrive at final terminal when spotted at ramp or unloading pad.
Departure - Time train starts to pull on main track or from yard.

CHICAGO AREA RAILROADS

Many of the railroads in the Chicago area are referred to by the use of other than their corporate names. Following is a list of corporate names, followed by the various initials and additional names commonly used:

Atchison, Topeka and Santa Fe: AT&SF, Santa Fe, SFe
Belt Railway of Chicago: BRC, Belt
Baltimore and Ohio: B&O
Baltimore and Ohio Chicago Terminal: B&OCT
Burlington Northern: BN, Q
Chicago & Eastern Illinois: C&EI
Chicago & North Western: C&NW
Chesapeake & Ohio: Chessie System, C&O
Chicago & Western Indiana: C&WI, Western Indiana
Chicago Jct.: CJ
Chicago, Milwaukee, St. Paul and Pacific: SMStP&P,
Milwaukee
Chicago River & Indiana: CR&I
Chicago Rock Island and Pacific: CRI&P, Rock Island,
R.I.
Chicago Short Line: CSL
Chicago South Shore and South Bend: CSS&SB, South
Shore
Chicago West Pullman & Southern: CWP&S
Erie Lackawanna: EL
Grand Trunk Western, GTW, Grand Trunk
Illinois Central: Gulf, IC
Illinois Northern: IN
Indiana Harbor Belt: IHB, Harbor
Louisville & Nashville: L&N
Manufacturer's Junction: MJ
Minneapolis, St. Paul & Sault St. Marie: Soo Line
Missouri Pacific: MP, MoPac
Norfolk & Western: N&W
Penn-Central: PC-NYC-PRR
