Manager Station Operations

Baltimore, Maryland

## INSTRUCTIONS

1. Scheduled road haul merchandise cars will be operated on the days due to be forwarded, except that, if necessary, they will be held to maintain for each particular schedule or carline the monthly average number of pounds prescribed by regulations in General Order O.D.T. No. 1, as amended, or as authorized by special or general permit issued by Office of Defense Transportation.

2. Unscheduled road haul merchandise cars will be operated with the minimum number of pounds prescribed by General Order O.D.T. No. 1, as amended, or as authorized by special or general permit issued by Office of Defense Transportation.

3. Way cars will be operated in accordance with schedules, which schedules conform with regulations in General Order O.D.T. No. 1, as amended, or with special or general permits issued by Office of Defense Transportation. Way cars will be split when the character or volume of tonnage requires. In such cases straight cars will be made to destinations, or way cars made to run out at convenient points, depending on circumstances. In preparing Form 2545-E, all cars loaded to a particular way-car territory will be reported under the schedule number of that particular territory and the territory covered by each car will be shown in column "Destination".

4. Use of cars within municipalities: Cars will not be loaded to points within switch limits, except in accordance with General Order O.D.T. No. 1, as amended, Section 500-2(a).

5. Where schedules provide for using inbound cars from certain points for loading outbound freight, Agents will be governed accordingly. Where schedules provide that certain cars will peddle or pick up, or do both, in a designated territory, such cars will be used strictly in accordance with the schedule.

6. The names of stations in the description of territory are "inclusive", unless shown as "exclusive". The territory for a particular schedule includes stations and junctions on intersecting lines, except where they are specifically included in another schedule.

7. Where schedules provide for freight being delivered to a connecting line at other than the billed junction, any freight handled at the billed junction in normal movement will be delivered at such junction, unless there are special instructions to the contrary.

8. Agents who load cars with less carload freight will make report on Form 2545-E to Manager Station Operations, at Baltimore, Md., listing cars in consecutive order as provided in merchandise schedule.

C. M. McKeen  
Manager Station Operations.
