N. & W.'s modernized coal classification yard at Portsmouth, Ohio

COAL and COKE OPERATIONS

Piers 5 and 4 and the extensive classification and storage yards of the N. & W.'s Tidewater Coal Terminal facilities

ON THE

Norfolk and Western Railway

CARRIER OF FUEL SATISFACTION

HOW TO USE THIS

List of Coal and Coke Operations

THIS VOLUME, produced for your convenience and information, contains the following information:

Pages 2 to 11, inclusive—An alphabetical list of operating companies grouped according to the fields in which their mines are located; a list of all mines on the Norfolk and Western; and a list of coal selling agents handling the product of these mines and operating companies. In all cases, complete addresses are given—mine, operating company, and selling agent.

Pages 12 and 13—Similar information for briquetting plants and coke ovens on the Norfolk and Western.

Pages 14 and 15—A traffic flow chart, showing graphically the normal distribution of Fuel Satisfaction.

Pages 16 to 18—A numerical list of mines in the various fields served by the Norfolk and Western Railway, together with the names of the producers operating each mine. It should be noted that each mine carries a mine number which is permanently assigned by the railroad and which is usually carried on all billing.

Pages 19 to 25, inclusive—An alphabetical list of coal selling agents with complete addresses of main and branch offices as well as a list of the operating companies and mines, the product of which is handled by each selling agency listed.

Page 26—Similar information for coke ovens on the Norfolk and Western.

Map (Inside Back Cover)—This nine-color map shows the entire coal producing area served by the Norfolk and Western Railway, including the various operating districts or "fields". Mines are indicated by black dots and numbers which are identified by an explanatory "key" on the margins. This "key" coincides with the mine numbers shown on pages 16 to 18.

Familiarity with the material included in this List of Coal and Coke Operations will greatly enhance its value. For instance:

If you know the name of the operating company, you can find the agent or agents selling the product of this operating company by referring to the list shown on pages 2 to 11, inclusive.

If you know the location of a particular mine and its number, you can find the name of the company operating the mine and the agent selling its product, by referring first to the list on pages 16 to 18 or the "key" on the map (either of which will give the name of the operating company) and second, by referring to the list on pages 2 to 11, inclusive, which will provide the name of the selling agent.

If you know the name of the selling agent, you can obtain complete and accurate information regarding the coal handled by this agent by referring to the list on pages 19 to 25, inclusive.

In addition to these suggested uses of the List of Coal and Coke Operations, many retail dealers and consumers find it convenient and useful as a reference book for names and addresses, etc. These uses are obvious and need not be explained in detail.

Any other information desired can be obtained readily by application to the Coal Traffic Department, Roanoke, Virginia; the Coal Bureaus, the addresses of which are shown on page 1 of this booklet, or any of the officers listed on page 28.

Call at any time for complete information about Fuel Satisfaction and for assistance in the solution of any fuel problem. There is no charge . . . your request will receive prompt and careful attention.
