Information Concerning Arrangement of Local (Divisional) Train Schedules and Indices

Schedules for trains are arranged by divisions in their geographical relation, with the Hudson Division first, followed by the Electric Harlem, Putnam, River, etc., to the Western Division, which is last. Train schedules for individual divisions are arranged as follows:

- 1st. Westward
- 2nd. Eastward
- 3rd. Turn-Around Runs

An index has been provided showing the divisions alphabetically. There is also an index arranging the trains alphabetically according to their symbol.

General Instructions

The trains specified herein must be run as set forth, both as to time and nature of work. No change is to be made in the schedules as outlined without proper authority and without notification of the Superintendents of Freight Transportation.

The trains mentioned herein must be designated at all times by their respective symbols.

FREIGHT AGENTS must familiarize themselves with the nature of these trains, and must know that their freight is forwarded in accordance with instructions contained herein.

YARD MASTERS must be thoroughly familiar with all trains herein specified which enter or leave their yards, and must preserve their identity and not allow them to become mixed with other freight in yard. When trains terminate in their yards, they must see that the freight going beyond makes the specified connections.

They must inform each freight conductor of the proper symbol for the train given him.

They will keep an ample supply of Freight Train-Books on hand, and furnish them to their assistants as needed.

TRAIN MASTERS will instruct conductors to ascertain symbol of train before leaving initial yard and use same on their running and car reports, also inform Enginemen, before leaving, as to symbol and schedule of train.

The loading and tonnage of each train must be determined by the Superintendent over whose division the train runs. Great care should be exercised in the matter in order that trains be not overloaded so that the running time can not be made.

Explanation of Train Symbols

The symbol is a combination of letters and numbers arranged so as to indicate over what division and in what direction the train operates. Each train herein is designated as stated above.

Dispatchers, yard forces, and conductors must not use the number alone. The letter or letters preceding the number must also be used.
