EXPLANATION OF NOTES, ABBREVIATIONS, AND REFERENCE MARKS

ITEM 9999920

EXPLANATION OF NOTES

1. No track connection between MF (or TP, CEI) and foreign carrier(s). Traffic for foreign carrier industries must be interchanged at junctions via which rates apply.
2. MP has no team track facilities.
3. All industries and team tracks are joint TP-SP.
4. No industry tracks--team tracks are joint MP-SP.
5. The Corpus Christi Terminal Association (CCTA) is an association of the Nueces County Navigation District and the three lines serving Corpus Christi. It serves all industries located on Nueces County Navigation District property, as well as the various docks belonging to the District. Lines serving Corpus Christi annually and alternately furnish all power and personnel to operate the Association's facilities. Industries served by this association are treated the same as if served by each of the lines entering Corpus Christi.
6. The Texas Mexican Railway (TM) has elected not to take its turn in operating the facilities and the MP and SP perform the required service, alternating each year.
7. All traffic originating or destined Council Bluffs, Iowa, is susceptible to cur lines via Omaha-Illinois Central. The Illinois Central interchanges traffic in switch move for our account with all Council Bluffs lines. Missouri Pacific also has direct connection with the Union Pacific at Omaha and where road-haul tariffs provide route via Omaha-Union Pacific, such traffic can be interchanged with the Union Pacific for switching to industries on their line.
8. Trackage of the DPS (TP subsidiary), which formerly served Denison from Sherman Jct on the TP--and trackage of KOG between Durant, Oklahoma and Denison has been abandoned. The TP now serves Denison over MKT tracks under a joint track agreement with the MKT between Durant and Whitesboro, Texas. While TP can originate and terminate traffic for MKT Denison industries which are open to reciprocal switching under their agreement with the MKT, the TP has no team track or other station facilities at Denison. Traffic for SLSF and SP at Denison can either be interchanged through the MKT at Denison or interchanged with those lines at Sherman, Texas.
9. The GHH is owned jointly by the MP and MKT and is operated for yearly periods alternating between the parent lines. Revenue is allotted to the parent line shown in the routing column of the waybill.
10. Canceled.
11. Canceled.
12. Ft Leavenworth traffic is switched by Leavenworth, Ks., switching engine to and from the Government Terminal Railroad (Plant Facility).
13. Under contract, TP performs all terminal, freight house and certain other services for account of MP. MP has equal rights with TP to industries and team tracks of TP, and cars arriving via MP are handled as promptly as cars arriving via TP.
14. Fort Worth Belt Railway (FWE) is a switching line owned jointly by MP (40 per cent) and TP (60 per cent). Industries and team tracks are open to all rail lines serving Ft Worth on a reciprocal basis.
15. The Galveston, Houston & Henderson (GHH) is owned jointly by the MP and the MKT and is operated for yearly periods alternating between the parent lines. Revenue is allocated to the parent line shown in the routing column on the waybill. Team tracks are restricted to road haul traffic of the MP and MKT only.
16. The Galveston Wharves (GW) properties comprising the docks, wharves, warehouses, export grain Elevator B terminal switching railroad, etc., are owned by the City of Galveston and are managed by the organization's Board of Trustees. All services incidental to the handling of traffic between rail line terminals and shipside, such as switching, loading, unloading, storing and checking, are performed by forces of that organization. The five rail lines make direct deliveries to GW tracks for placement to industries and piers on GW property. GW also makes deliveries of cars from its piers and industries direct to the five rail lines, such services being performed with GW engines.
17. Served by Great Southwest RR (GSW), a switching line only, connecting with TP and RI.
18. No industries at this point served by track.
19. The Houston Belt Terminal Railway Company (HBT) is a terminal switching line owned jointly by MP (50 per cent), ATSF (25 per cent), RI (12 and one-half per cent), and FWD (12 and one-half per cent). Under contract, it performs terminal service for the owning lines.

CONT'D IN NEXT COLUMN

EXPLANATION OF NOTES, ABBREVIATIONS, AND REFERENCE MARKS

ITEM 9999920

CONT'D

EXPLANATION OF NOTES

20. The Port Terminal Railroad Association (PTRA) is a switching line comprised of lines serving Houston and owned by the Harris County Ship Channel Navigation District. The activities of the association are directed by the member lines and the Navigation District. The Chairman of the Navigation District is also Chairman of the Board of Control of the PTRA. All carriers have equal switching rights at industries served by this line. Under terms of the contract for joint switching of PTRA trackage, all industries located on the PTRA may be considered, for solicitation purposes, to be located on the MP. The PTRA has no team tracks.
21. Canceled.
22. NKC means North Kansas City, Mo--KCK means Kansas City, Ks.
23. Kansas City Terminal Ry. (KCT) is a terminal line whose tracks are open to reciprocal switching to all railroads entering Kansas City. This terminal is owned jointly by all trunk lines entering Kansas City.
24. Kansas and Missouri Ry. & Terminal (KM) is a KCS-owned terminal line performing switching service for all railroads at Kansas City, Mo-Ks., between industries, team tracks and freight houses on its own rails and all lines diverging, with direct physical connections with the RI, KCS, KCT and MP.
25. Canceled.
26. WL means West Lake, La--WLC means West Lake Charles, La. WL is located within switching limits of Lake Charles. WLC, served by KCS and SF, is located outside the switching limits of Lake Charles. MP performs switching for Lake Charles Harbort and Terminal District (LCHT).
27. Canceled.
28. The St. Louis Southwestern Ry (SSW) operates over the rails of the RI between Brinkley and Bridge Junction, Ar., and over rails of the Arkansas & Memphis Railway Bridge and Terminal Company (owned by MP, RI and SSW) between Bridge Junction, Ar., and the east bank of the Mississippi River at Memphis, Tn. The IC takes charge of SSW freight trains on the east bank of the river and performs all SSW switching, including cars interchanged with other Memphis lines for road-haul movement and cars to or from industries. The SSW is tenant in IC freight station and has access to all IC team tracks and other facilities for receipt or delivery of freight. All industries served by IC tracks at Memphis are also considered SSW industries.
29. The TP-MP Terminal Railroad of New Orleans is jointly owned and operated by the MP and TP. It performs switching and other services at industries and warehouses on the west bank of the Mississippi River reached by its rails and in New Orleans proper. The Terminal Company handles all trains of the parent lines between Avondale and New Orleans over the Huey P. Long Bridge (NOPB trackage).
30. The New Orleans Public Belt (NOPB) is a terminal switching line and handles cars in switch movement only. NOPB team tracks are open to all railroads entering New Orleans.
31. Omaha, S. Omaha and Council Bluffs are considered one terminal on grain traffic, and reciprocal switching prevails at all elevators in these three terminals. Some Council Bluffs traffic, other than grain, can also be routed to or from Omaha via UP, but tariffs should be checked to determine applicability.
32. The City of Orange owns the Port of Orange. The Orange Terminal is the part of the port facilities that connects the MP and the SP with the other port facilities. The Orange Terminal has no locomotive power and switching is performed by the MP.
33. Canceled.
34. Split-delivery service available.
35. MP-DRGW joint terminal-under DFCW operation.
36. Union Terminal Railway (UT) and St. Joseph Belt Railway (SJB) are MP subsidiaries.
37. Missouri Pacific has proprietary interest in PTRA.
38. Canceled.
39. The Texas City Terminal (TCT) is a switching line owned jointly by the MP, MKT and ATSF. Reciprocal switching is accorded the RI, FWD and SP.
40. Industries on the Tulsa Sapulpa Union Railway (TSU) are switched by the TP from the MKT and ATSF through the TP to the TSU. TP and SLSF have the only direct connection to the TSU. Industries on the Sand Springs Railway (SS) take Tulsa rates, and all lines give SS waybills on all cars.
41. Joint TP-MKT station.
42. The Wichita Terminal Association (WTA) is a switching line owned jointly by the lines serving Wichita.
43. Transloading service available only for military household goods.
