FOREWORD

Maps on the following pages are not drawn to scale. They are issued to serve as a guide in locating customer's tracks and the numbers assigned them.

The zones are developed by consolidating one or more switching districts or industry engine assignment service areas into a zone. Two digits are used to identify a zone on the maps and zone/track listing of industries. If a zone has only one digit, it will appear as 01, 02, etc.

The track numbering for industrial tracks within each zone will be a three-digit number in series 700-999, which is assigned to each track and the number painted on the switch target, where practicable. For example, if the number 04-700 appears on a switch list, it would designate Zone 4, Track 700.

The place or places on each industrial track where a car is spotted for loading or unloading is assigned a spot number. Where more than one customer is located on the same track, the spot numbers will identify the individual customer's location on that track. Thus, if a car is to be spotted for Hi-Line Wood Products, it would appear on the switch list as 04-700-90; that is, Zone 4, Track 700, Spot 90.

When possible, the spot numbers are placed at the center of the car spots on the industry tracks to assure proper spotting of the car. Where it is not possible to actually place a spot sign at such places as Team Tracks, open areas for scrap or lumber and other similar places, a spot code is used. Codes are selfexplanatory and appear on the following page.

+++++

SPOT NUMBERS

- 00 - LEAD OR NO SPECIFIC SPOT, OR CUSTOMER WILL SUPPLY INSTRUCTIONS.
- 01-87 - FOR SPECIFIC LOADING/-UNLOADING PLACES ON INDUSTRIAL TRACKS.
- 88 - CUSTOMER HAS NOT YET PROVIDED INSTRUCTIONS, CAR CANNOT BE SPOTTED.
- 90 - OPEN AREA SCRAP, LUMBER, ETC., SPOTTING.
- 91 - STORAGE OR HOLD SPOTS.
